#CO-OP STATUS

Available for second Co-op term in Jan 2017

Will have completed five of eight academic terms in Jan 2017

#EDUCATION

Bachelor of Computer Science (Jan 2015 – Present)

Dalhousie University, Halifax, NS

#SKILLS SUMMARY

@TECHNICAL {

<iOS (Swift)/>

<Python (Flask && Crawler)/>

<Java/>

<Machine Learning/>

<Database (MongoDB && MySQL)/>

<Unix/>

<Agile/>

<Git />

<C/>

<Visual Studio/>

<Eclipse/>

<Matlab/>

}

@NON-TECHNICAL {

- **Communication:** Fluent and proper written and oral English
- **Self-motivated:** Learned iOS programming, Python, Machine learning independently
- **Time Management:** Managed the time for school and part-time job with no delayed assignment or project
- **Team player:** Work coherently and efficiently with team members. Good at discovering potentials of members and assigning related tasks to them as a leader

}

#RELEVANT PROJECTS

@COURSE SPIDER (2016) {

<https://github.com/YaxinCheng/Course-Spider>

An online crawler for Dalhousie Academic Timetable. Fully designed and programmed by Python3

- Analyzed web API of Dalhousie University, and built a simple demo crawler to accept the returned html file from the server
- Separate the html file returned by the server to different blocks by regular expressions
- Implemented the BeautifulSoup package to parse each block for well formatted information
- Refactoring code to better encapsulate the crawler functions and courses information
- Installed Flask, and built a RESTful API for manipulating the crawler through http requests
- Hosted the program on Heroku and wrote documents

}

@News Hub (2016) { <https://github.com/YaxinCheng/NewsHub-iOS>
A full stack news app, with Flask restful backend and Swift Protocol-Oriented front end

- Designed efficient regexes for news from MetroNews and Chronicle, and created crawler based on these
- Built restful API with Flask ensures the easy manipulations to the crawler
- Set up a MongoDB to persist app data, news, and user data, which largely speeded up the app
- Added image searching and compression functionalities for a better user experience
- Hashed users' passwords with salts to increase the security level of the app
- Designed app based on the restful API by Swift which makes the app concise and fast
- Largely applied value types and Protocol-Oriented Programming soars up the app's speed
- Grand-Central-Dispatch (Multithreads) ensures NewsHub runs smoothly all the time

}

#EXPERIENCE

@Green Power Labs Inc. (May, 2016 – Aug, 2016)
Junior Programmer, Buildings {

- Quickly read and studied existing documents to thoroughly understand the current system and get into work fast
- Built a stand alone testing app based on documents to help debug and test
- Developed a flask based backend to collect user feedbacks, which optimizes the learning accuracy
- Thoroughly Understood the idea and importance of TDD according to working in real software industry
- Learned the importance of planning for the future before coding from practiced colleagues
- Gained real team working experience and optimized communication skill by cooperating with 5 team members coherently

}

@Dalhousie International Centre (Jul, 2015 & Jan, 2016)
Student Coordinator {

- Registered new students for the orientation by corresponding with them
- Picked new students up, and directed them to their accommodations in order to ensure that they arrive on campus safely
- Arranged meeting rooms during the orientation day to provide new students a welcoming space
- Conducted campus orientation as well as answered student questions in order to introduce the campus life to the students

}

@Halifax Busker's Festival (Oct, 2015)
Stage Manager and Program Seller {

- Ensured the artists' performances by keeping stage clear and helping to install their equipment
- Balanced the budget for the organizer by selling the programs
- Maintained the order by organizing people to stay in certain areas
- Ensured the public security by reporting lost children and dangerous behaviours

}
